

UNIVERSAL ENERGY SAVING AC SMART REMOTE

FROM
Aircon Off®

✓ SAVE POWER SAVE MONEY

The Aircon Off Smart Remote is a high quality pre-programmed tamperproof universal AC remote.

Although it is recommended that air-conditioning is run at no lower than a comfortable 23°-25° for cooling and no higher than 20° or 21° for heating, users often run AC at much lower or higher temperatures than this. When air-conditioning is run at extreme cold or hot temperatures, there is higher power consumption (of up to 35%) and an increased risk of breakdown.

The Aircon Off Smart Remote is preset to automatically limit the operational temperature range of the equipment to an economic 21-30 for cooling and 17-23 for heating. (These settings are fully adjustable during set up, so you can have even more control and actually set the minimum and maximum temperatures that users can access when they operate the air conditioner).

This and other features make it a unique cost saving device that will quickly pay for itself.

Every air conditioner should have one!

Features:

- ✓ SUITABLE FOR DOMESTIC AND COMMERCIAL APPLICATIONS.
- ✓ DESIGNED TO REDUCE POWER AND MAINTENANCE COSTS.
- ✓ UNIQUE PRESET REDUCED TEMPERATURE RANGE FOR ENERGY EFFICIENT OPERATION UNIQUE
- ✓ INSTANT HEAT & INSTANT COOL SMART KEY FUNCTION.
